

Monthly Security Operations Report :VertexOne Digital Services

Reporting Period: Current Month

Summary

10 controls from the Statement of Applicability are now operational. Vulnerability management and access controls are tracking well. Backup restoration testing and supplier security remediation remain the primary gaps.

Key Metrics

Metric	Result	Target	Status
MFA enrollment (all users)	62%	100%	Below target
Critical vulnerability SLA compliance	88%	95%	Below target
Backup job success rate	100%	100%	On target
Backup restoration tests completed	0	1 per quarter	Not started
Security awareness completion	68%	95%	Below target
Vendor security addenda signed	2 of 4	4 of 4	In progress

Incidents This Period

No security incidents were reported during this period.

Exceptions Logged

One configuration drift exception was identified on a non-production storage account. The exception was remediated within 3 business days.

Recommendations for Next Period

1. Prioritize full MFA rollout.
2. Schedule the first backup restoration test.
3. Follow up on the two outstanding vendor security addenda.
