

Security Awareness Plan :VertexOne Digital Services

Purpose

Establishes a role-differentiated security awareness program addressing the inconsistent regional awareness levels identified in the Day 1 Organizational Context Analysis, supporting Annex A control A.6.3.

Program Structure

Audience	Topics	Frequency
All Employees	Phishing recognition, password hygiene, incident reporting	Annual, mandatory
Engineering	Secure coding practices, dependency management	Semi-annual
Customer Support	Social engineering, identity verification	Semi-annual
IT Operations	Cloud misconfiguration risks, privileged access hygiene	Quarterly
New Hires	Full onboarding awareness module	Within first 2 weeks of employment

Delivery Method

Centralized Learning Management System (LMS) with automated completion tracking and manager escalation for overdue completions.

Measurement

- Completion rate by region and role, reported monthly
- Phishing simulation click-rate trend, tracked quarterly
- Annual awareness assessment score

Target

95% completion organization-wide within each training cycle, with no regional office more than 10 percentage points below the organizational average.
