

Control Effectiveness:VertexOne

Control	Design Effectiveness	Operating Effectiveness	Notes
A.8.5 Secure Authentication	Adequate — policy covers all user tiers	Not yet testable — rollout in progress	Full org-wide MFA required before testing operating effectiveness
A.8.2 Privileged Access Rights	Adequate	Not yet testable	Privileged account inventory must be finalized first
A.8.8 Vulnerability Management	Adequate — SLA defined at 15 days for critical	Partial — current patch cycle exceeds SLA on 2 of 5 samples	Requires escalation to close SLA gap
A.8.13 Backup	Needs Improvement — restoration testing not yet defined in design	Not yet testable	Design must specify testing cadence before operating effectiveness can be assessed
A.7.2 Physical Entry	Adequate	Effective — badge logs reviewed for the past quarter show consistent enforcement	No further action required this cycle
