

ISMS Scope Statement

Organization: VertexOne Digital Services

Purpose

This document defines the boundaries and applicability of the VertexOne Digital Services Information Security Management System (ISMS) in accordance with **ISO/IEC 27001:2022 Clause 4.3 – Determining the Scope of the Information Security Management System.**

Scope Statement

The VertexOne Digital Services ISMS covers the people, processes, and technology involved in the design, development, delivery, and operation of the organization's customer Software-as-a-Service (SaaS) platform and public customer portal, including supporting corporate systems, across the Singapore headquarters and APAC regional offices.

In Scope

- Customer SaaS platform and public customer portal (production and staging environments)
- Microsoft Azure cloud infrastructure supporting in-scope applications
- Microsoft 365 Enterprise environment (email, collaboration, identity, and productivity services)
- Internal ERP system supporting finance and operations
- Human Resources (HR) system used for employee lifecycle management
- Singapore headquarters and all APAC regional office locations
- Employees, contractors, and authorized third parties with access to in-scope systems
- Vendor relationships providing critical infrastructure or processing services for in-scope systems

Out of Scope

- Marketing website content management system (does not process customer or employee personally identifiable information)
- Legacy archived systems decommissioned before ISMS implementation
- Non-critical internal tools with no connectivity to in-scope environments

Assumptions

- Microsoft Azure and Microsoft 365 maintain independent security certifications (e.g., ISO/IEC 27001 and SOC 2) covering the underlying cloud infrastructure.
- Regional offices comply with centrally issued information security policies unless a documented local exception has been approved.

Dependencies

- Cloud provider shared responsibility model documentation
- Vendor Risk Management process for third-party oversight
- HR onboarding and offboarding process used as the authoritative source for access provisioning and deprovisioning

Scope Boundaries :

Physical Boundary

Singapore headquarters and all APAC regional offices.

Organizational Boundary

All business units supporting the development, delivery, and operation of the customer SaaS platform.

Technology Boundary

Microsoft Azure Cloud, Microsoft 365, ERP system, HR system, customer-facing applications, and supporting infrastructure.

Information Boundary

Customer personally identifiable information (PII), employee information, financial records relevant to in-scope systems, authentication credentials, and business operational data.

Approval Statement

This ISMS Scope Statement shall be reviewed by the Chief Information Security Officer (CISO) and formally approved by the Chief Executive Officer (CEO) prior to the Executive ISMS Kickoff Meeting.
